BMO MatchMaker® Strategic Investment Service

About BMO MatchMaker

BMO MatchMaker Strategic Investment Service helps you build a mutual fund portfolio that can work for you even when you're spending time looking after other important priorities in your life. BMO MatchMaker offers a disciplined and structured approach to investing and is uniquely designed to work for you and your investments.

BMO MatchMaker Strategic Portfolios are re-balanced periodically to maintain your original mix of assets. They are generally reviewed four times a year and will automatically be rebalanced for you if the strategic portfolio exceeds its set target range in order to restore the recommended weightings of the funds in the portfolio. For more information on the target ranges, please refer to the BMO Mutual Funds Simplified Prospectus.

Benefits of BMO MatchMaker

- Time savings and convenience
- Based upon strategic asset allocation
- Helps optimize return for different risk tolerances
- Provides automatic rebalancing
- Access to professional money management

Portfolio Objective

BMO MatchMaker Savings Portfolio is suited to the savings-conscious investor. Emphasis is on capital preservation and flexibility with limited exposure to BMO Mutual Funds invested in stocks or equities.

As with all BMO MatchMaker Strategic Portfolios, your contributions will be automatically distributed according to the make-up of your Savings Portfolio. For the GIC portion of this portfolio, the minimum purchase is \$250. Contributions will accumulate in a BMO Bank of Montreal Daily Interest Savings Account and a GIC will automatically be purchased once the \$250 minimum amount has been accumulated. Because this portfolio contains a GIC component and has been designed to provide investors with less variability, this portfolio will not be automatically rebalanced.

Disclaimer

BMO Mutual Funds and BMO MatchMaker Strategic Portfolios are offered by BMO Investments Inc., a financial services firm and separate legal entity from Bank of Montreal.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments and the use of an asset allocation service. Please read the prospectus of the mutual fund before investing, including the prospectus of the participating funds in which investments may be made under an asset allocation service. Except as otherwise noted, the indicated rates of return are the historical annual compounded total returns including changes in unit or share value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. For portfolios offered under an asset allocation service, the indicated rates of return assume the investment strategy recommended by the asset allocation service is used and are after deduction of the fees and charges in respect of the service. In addition, the returns are based on the historical annual compounded total returns (as described above) of the participating funds. Mutual funds are not guaranteed or covered by the Canada Deposit Insurance Corporation, the Régie de l'assurance-dépôts du Québec or by any other government deposit insurer. The value of mutual funds change frequently and past performance may not be repeated.

On June 22, 2009, the overall weightings of the funds within these portfolios, as well as the fund holdings themselves were adjusted. This adjustment could have affected the performance of the portfolios, had it been in effect throughout the performance measurement periods presented.
